👁 Did you spot any other flowers, minibeasts, birds or animals on your walk?

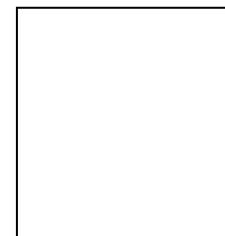

If So, draw them in the boxes here or in the boxes above

👂 Spring is a season full of sound. Find a quiet spot, be still and listen for a while. You may hear woodpeckers drumming as they make their nesting hollows, birds singing, cuckoos calling, bees buzzing, rustles from birds or squirrels in the undergrowth, the breeze in the tree tops or if you're unlucky, the sound of falling rain!
